On request an interview with a reference can be scheduled.

Profile

I'm Olivier and forever since I learned to use a computer I love to dive in to things and look deeper than the usual front-end shows. I like to look in to the code behind it and see how it's made.

Making solutions that solve daily struggles gives me a great feeling. I'm a good listener and like to make a plan before I start developing. For me it's important that what you really need is what I will deliver.
